
CAREER OPPORTUNITY

POSITION: ASSOCIATE TOXICOLOGIST

REPORTS TO: Manager, Toxicology Services

DURATION: Full-time

PRINCIPAL DUTIES:

- Develop preliminary toxicity classification documents and cytotoxicity assessments
- Perform literature searches and provide assistance as required in the development of full toxicity categorizations and Occupational Exposure Limits (OELs)
- Work with the business group, project managers, site management and site Environmental Health & Safety departments on the toxicity evaluation for active pharmaceutical ingredients as required
- Track all toxicity categorizations and related information in spreadsheets and databases
- Evaluate whether active pharmaceutical ingredients meet GMP regulations
- Provide support for toxicology related questions as required
- Provide support to Manager, Toxicology Services as needed
- Ensure timely completion of all toxicity requests

SKILLS/EXPERIENCE REQUIRED:

- BSc degree in toxicology or pharmacology (recent graduates are encouraged to apply)
- Ability to determine the toxicity categorization of pharmaceutical active compounds based on clinical and other toxicological information skills
- Ability to perform literature searches to assist in determining an appropriate Occupational Exposure Limit (OEL) for active pharmaceutical ingredients
- Hands-on experience accessing information from electronic databases
- Experience in summarizing complex technical information
- Excellent computer skills – Word, Excel
- Strong interpersonal skills
- Well organized with attention to detail

APPLICATION DEADLINE: November 30, 2009

Interested candidate should apply to: corp.hr@patheon.com
